

# What it costs, and what is left

Every figure is a model, not a measurement. The assumptions are written below so you can argue with them — change one and the whole sheet moves.

### 24 of 25 lose money or come close at retail prices

Shaded rows earn under 35% gross when stems are bought at Trader Joe’s or Whole Foods. That is before your own time, and before anything goes wrong.

The same pieces are healthy on wholesale. This sheet is really one argument: the trade account is not admin, it is the difference between a business and an expensive hobby.

### Assumptions

- Stems at **\$3.00** retail, **\$1.50** wholesale, per usable stem — waste and unusable heads included.
- Vessel: \$8 Petite, \$14 Signature, \$22 Statement. Nothing for hand-tieds.
- Consumables **\$3.50** — wire, tape, card, envelope, food sachet, wrap.
- Stripe at 2.9% + 30¢. Your 3.5% charge covers this and a little over.
- Build time: 45 min Petite, 1h15 Signature, 2h15 Statement. Excludes sourcing, conditioning and the drive.
- Delivery is priced separately and is not in these figures. At \$12 local against roughly \$6 of fuel and wear, a local run roughly covers itself.
