

The Fall Edit — Hand-Tied — Bouquet

A hand-tied bouquet in the Olive Smoke palette. · **\$115** · about 24–32 stems

The shop photograph — what the customer is buying.

PALETTE

Olive, smoke grey, white-green, dusty blue

Herbal, quiet, architectural. Swatches are indicative, not measured — buy to the words and the photograph.

Olive

Smoke

White-green

Dusty blue

VESSEL & MECHANICS

Hand-tied in the hand, spiral bind, wrapped. No vessel.

If the vessel is unglazed stone or concrete it is porous — it weeps and marks a table. Drop a plain plastic or glass liner inside and put the water and the wire in that, or use a glazed vessel and skip the problem.

STEMS

What goes in, and when you can get it

STEM	QTY	AVAILABLE
Olive Branch	5	JFMA MJ JASON D
Smokebush	4	JFMA MJ JASON D Summer into autumn.
Hellebore	3	JFMA MJ JASON D Late winter into early spring. Not findable in autumn.
Chrysanthemum	5	JFMA MJ JASON D

Check the calendar before you promise this one. Smokebush, Hellebore have a limited season — the strip above shows when. Outside those months, substitute on palette rather than on name: the customer bought a colour and a feeling, not a botanical list.

SOURCING

Where to order

YOUR WHOLESALER

The right call for a Statement, or any week with three or more arrangements. Box minimums make it wasteful for a single order — check the cutoff, it is usually the morning before.

FARMSTAND / FARMERS MARKET

Dahlias, seasonal branches, anything with real character. July to first frost this is the best floral buying in New Jersey, and cheaper than wholesale.

TRADER JOE’S

Reliable for roses, lisianthus and eucalyptus. Buy on colour, not on label, and walk past anything clear or bright if the palette is a muted one.

WHOLE FOODS / RETAIL FLORIST

The gap-filler. More expensive per stem but worth it for the one thing that makes the piece — and a retail florist will sell you single stems.

BUILD

Order of work

1	Condition
	Cut on an angle, strip below the waterline, two hours minimum in cool water in the dark. Longer if it travels.
2	Mechanics
	Hand-tied in the hand, spiral bind, wrapped. No vessel.
3	Foliage sets the silhouette
	Establish the shape and the one long line before any flower goes in. The asymmetry is decided here.
4	Focal flowers
	Asymmetric cluster, varied heights, faces turned differently. Never a dome.
5	Secondary, recessed
	Slightly deeper than the focals. This is where depth comes from.
6	Accents last, riding high
	Above the mass on their own stems. Resist tucking them in.
7	Texture into the gaps
	Fill the negative space without closing it. Stop earlier than feels finished.

No two arrangements are identical — the studio says so publicly, and it is true. This sheet is the target, not a specification. Match the palette and the scale and the customer has what they paid for. · DreamersJoy Floral Studio
