

IN A VESSEL

Caring for your arrangement

1. **Top up the water every day.** The flowers sit on a wire frame and drink quickly — a Signature can take a cupful in a day. Pour gently down the inside.
2. **Do not recut or rearrange.** Each stem is placed into a frame. Lifting one out is how an arrangement comes apart.
3. **Change the water every third day** if you can do it without disturbing the stems. Cloudy water shortens everything.
4. **Keep it cool.** Out of direct sun, away from radiators and vents. A cool room overnight can add days.
5. **Away from the fruit bowl.** Ripening fruit gives off a gas that ages flowers faster than anything else in a kitchen.
6. **Lift out anything spent.** The rest will keep going, and the shape holds.

Any trouble at all, write to us — we would always rather know.
